

Job Title: Project Manager

Company: Forth Engineering (Cumbria) Ltd

Location: Barrow-in-Furness, Cumbria

Salary: Competitive, based on experience

Job Type: Full-time, Permanent

About Us: Forth Engineering (Cumbria) Ltd is an innovative engineering company with over 20 years of experience delivering cutting-edge solutions for the energy, nuclear, and subsea sectors. Based in Cumbria, we pride ourselves on our collaborative approach, using advanced technology to tackle complex challenges. Our Barrow office is at the heart of some of the UK's most significant engineering projects, and we are looking for a talented Project Manager to join our dynamic team.

Role Overview: As a Project Manager at Forth Engineering, you will be responsible for planning, executing, and overseeing engineering projects from inception to completion. This role will involve working closely with multidisciplinary teams to deliver projects on time, within scope, and within budget. You will play a crucial role in managing client relationships, coordinating resources, and ensuring the highest standards of quality and safety.

Key Responsibilities:

- Lead and manage engineering projects, ensuring they are delivered on time, within budget, and to the required quality standards.
- Define project scope, goals, and deliverables in collaboration with clients and stakeholders.
- Develop detailed project plans, schedules, and budgets.
- Coordinate internal resources and third parties/vendors to ensure project success.
- Identify and mitigate project risks, escalating issues as necessary.
- Monitor and report on project progress to senior management and clients.
- Manage client expectations and maintain strong working relationships.
- Ensure adherence to health, safety, and environmental regulations.
- Conduct project post-mortems and create recommendations for future projects.

Key Requirements:

- Proven experience as a Project Manager, ideally within the engineering or manufacturing sectors.
- Strong understanding of project management methodologies.
- Excellent leadership and interpersonal skills, with the ability to communicate effectively with clients, team members, and senior management.
- Strong problem-solving skills and the ability to make critical decisions under pressure.
- Experience managing projects with complex logistics and technical requirements.
- A degree or equivalent qualification in engineering, project management, or a related field.
- Proficiency with project management software (e.g., MS Project).
- Full UK driving license and the ability to travel when required.

Desirable:

- Experience in the energy, nuclear, or subsea sectors.
- Project Management Professional (PMP) or equivalent certification.
- Familiarity with industry-specific safety and quality standards.

What We Offer:

- Competitive salary.
- Opportunities for professional development and career progression.
- The chance to work on challenging and innovative engineering projects.
- A supportive, collaborative, and inclusive working environment.

How to Apply: To apply, please send your CV and a cover letter outlining your experience and suitability for the role to carl.hallows@forth.uk.com by **29th November 2024**. Early applications are encouraged, as we will review and interview candidates on a rolling basis.
